

Aviation Maintenance Never Events (AMNE)

– Key Takeaways

1. All too-common aviation maintenance incidents and accidents are 100% preventable
2. The most common are: Wrong Part, Wrong Fluid, Wrong Person, Lost Tool(s), Improper Movement, and Unsecured Panels
3. Know the common *violation producing conditions*, mitigate their existence, and eliminate the six AMNEs
4. Personal accountability is key – ***Not on this task, Not on my watch, Not on this aircraft***
