

Runway Excursions – Make It STOP!

1. A thorough approach & landing brief can save your ass..ets.
2. A stabilized approach is the prudent and professional pre-work for a safe landing, but it's no guarantee.
3. Pros don't float. Building a habit of consistent, deliberate landings near the runway aim point will serve you well – put safety ahead of 'style'.
4. A go-around is NOT your enemy.
